

Why Replace?

Restore!

SAVE BIG \$\$\$

Replacing your bathtub involves not only the cost of the new tub, but the added expense of replacing wall and floor tile, wall board, plumbing and hardware. Refinishing with *Glass-Tech 900™* quickly transforms your tub to a sparkling factory-new finish.

Refinishing your existing bathtub with the *Glass-Tech 900™* system is the most economical way to revitalize your bathroom and you will realize spectacular savings, often as much as 80% over replacement!

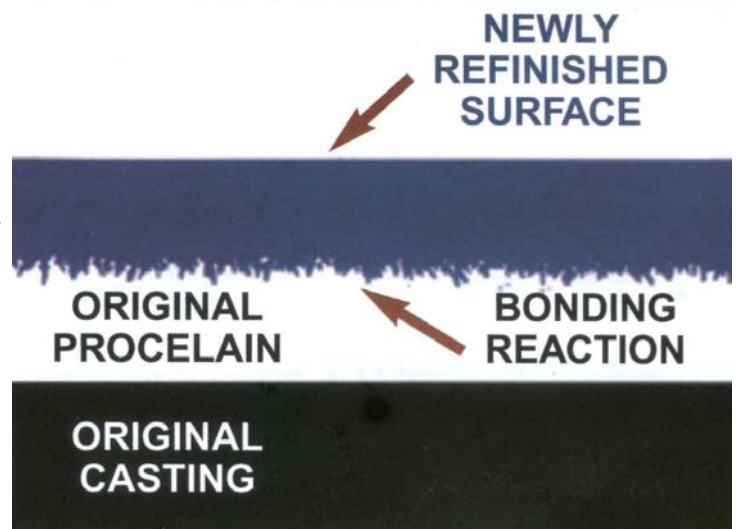

HOW DOES IT WORK?

Glass-Tech 900™ is a remarkable time- tested method developed specifically for bathroom refinishing. The secret lies in the ability of the compounds to fuse on a molecular level to the substrate, becoming a permanent part of the original surface, unlike bath liners.

Your refinished bathtub is easy to clean and the *Glass-Tech 900™* process ensures the most protection against impacts, stains, and chemicals delivering many more years of reliable service.
